issues

ENVIRONMENTAL STATEMENT

for PSP Pohony a.s.

PSP Pohony a.s. has been our client for many yers and we provide professional supervision over the fulfilment of environmental protection obligations.

We declare that PSP Pohony a.s. emphasizes the reduction of negative impacts of its activities on the environment, in particular:

1. Consistently complies wiht the obligations and requirements of all applicable laws, regulations and other environmental regulations
2. It emphasises the prevention of environmental pollution, in particular minimising the impact of its activities:
   - in the area of the waste management – prevents the generation of waste, ensures separate collection of waste suitable for reuse or recycling in accordance with the waste management hierarchy, preferentially uses reusable packaging for shuttle transport of products to its customers
   - in the field of air protection – e.g. modernisation of heating in production halls
   - in the area of water protection – the company has prepared and approved an Emergency Plan for the event of an accident in case of a spill of hazardous substances, it is a set of measures for the event of an accident
   - in the field of nature protection and quality of life support – support of regional projects, organisations, e.g. support for the onkology centre of the Olomouc University Hospital
   - in the field of natural resources – reduction of energy consumption (modernisation of the production park, installation of LED lighting in production halls), reduction of water consumption (installation of new washing/degreasing equipment with waste-free technology)
3. the company regularly provides educational and training events for its employees on environmental protection.
